PROFESSIONAL SUMMARY

2026 B.Tech Cyber Security graduate focused on SOC and blue-team work: alert triage, threat hunting and incident response. EC-Council Certified SOC Analyst with hands-on experience in vulnerability assessment (Nessus, OpenVAS, Nmap, Burp Suite) and security automation in Python and PowerShell. Built an approval-gated incident response bot and an Azure Sentinel threat-hunting lab. Strong analytical and communication skills, and comfortable working independently in remote teams.

EDUCATION

B.Tech, Cyber Security · Presidency University, Bengaluru — 2026 · CGPA 7.93

EXPERIENCE

Junior Cybersecurity Intern · HackerHub8 — Jan 2026 – May 2026

HH8 Vulnerability Scanner (Python)

- Built a Python web vulnerability scanner using breadth-first crawling and OWASP security-header analysis.
- Detected exposed endpoints and generated structured JSON reports for assessment work.

G9S Force Security Services website

- Developed and deployed a secure company website with HTML, CSS, JavaScript and Bootstrap.
- Assisted the HackerHub8 team with the pre-launch security assessment.

Cyber Security Intern · Prodigy InfoTech — Nov 2025

- Developed Python security tools for threat detection and network analysis.
- Created a packet sniffer with socket and Scapy for traffic monitoring.
- Documented security processes, findings and remediation recommendations.

PROJECTS

IR-Bot · Incident Response Playbook Bot — PowerShell · Node.js · Slack API

- Built a chat-based incident response bot that runs SOC actions (host isolation, log collection, containment) through PowerShell Remoting.
- Added a human approval gate: containment runs only after an analyst approves, and every step is written to a JSON audit trail.

Azure Sentinel Threat-Hunting Lab — Microsoft Sentinel · Logic Apps · MITRE ATT&CK

- Built a Sentinel lab with AI-assisted KQL detections for anomalous logins, privilege escalation and data exfiltration, mapped to MITRE ATT&CK.
- Automated alert handling and incident creation with Azure Logic Apps playbooks. Currently learning KQL hands-on.

QURIK · Hybrid Intrusion Detection & Prevention System — Python · FastAPI · React · TensorFlow · SQL

- Designed a web-based IDS/IPS combining a WAF, ML-based traffic classification and anomaly detection with a real-time analytics dashboard.
- Detects SQL injection, XSS and path traversal, with automated alerting and IP blocking for security operations workflows.

E-Governance Security Monitoring System · AICTE

- Built a real-time security dashboard for monitoring, anomaly detection and alerting, with automated response to SQLi, XSS and bot attacks.
- Supported compliance through content-based log classification.

SECURITY OPERATIONS EXPERIENCE

- Conducted vulnerability assessments with Nessus, OpenVAS and Nmap, and analysed the findings.
- Analysed network traffic in Wireshark to identify anomalies and threats.

- Configured firewalls and access control policies in Active Directory.
- Investigated Microsoft Purview DLP alerts and carried out response actions.

TECHNICAL SKILLS

Security assessment	Vulnerability scanning, penetration testing, risk identification, security audits
Threat analysis	SIEM monitoring, log analysis, MITRE ATT&CK mapping, Microsoft Sentinel (lab), KQL (learning)
Incident response	Alert triage, playbook development, containment, remediation, compliance reporting
Network security	Firewall configuration, IDS/IPS, access control policies, DLP monitoring
Tools	Nessus, Burp Suite, Wireshark, Nmap, Metasploit, OpenVAS, Microsoft Purview DLP
Scripting	Python, PowerShell, Node.js
Platforms	Windows Server, Linux, Active Directory, Azure
Frameworks	MITRE ATT&CK, NIST CSF, ISO 27001

CERTIFICATIONS

EC-Council Certified SOC Analyst (CSA) · ECC9531026478 — Oct 2025

EC-Council Certified Network Defender (CND) · ECC2591834067 — Jan 2023

Graduate Program in Cyber Security, Ehack Academy (curriculum covering CEH, CHFI, CCSE) · No. 115623 — Jun 2025

EC-Council Certified Secure Computer User (CSCU) · ECC4518297630 — Sep 2023

Certified Penetration Tester (CPT), RedTeam Hacker Academy — In progress

Microsoft Cybersecurity Architect Expert (SC-100 track) — In progress — 2026

ACHIEVEMENTS

- **SUMERU AI CTF**: solved 6 of 7 challenges, including LLM exploitation (April 2026).
- **Smart India Hackathon 2025**: selected with Team Vikasana (blockchain-based supply chain transparency for agricultural produce).
- **Inventra Competition**, Cybersecurity Department: 2nd place.

ADDITIONAL INFORMATION

Available for fully remote work and flexible across international time zones. Languages: English (fluent), Kannada, Tamil, Hindi.
